

DEEPIKA R

DATA SCIENCE PROFESSIONAL

+91 9629968985 | ravideepika991@gmail.com | Coimbatore, Tamil Nadu | github.com/Deep1456 | linkedin.com/in/deepika-ad

PROFESSIONAL SUMMARY

Data Science professional with a versatile technical skill set spanning machine learning, predictive modeling, and full-stack web development. Proficient in Python, SQL, JavaScript, and React, with experience building APIs, integrating databases, and developing models that convert complex datasets into actionable business insights across 6+ projects and 3 internships.

SKILLS & CERTIFICATIONS

Programming Languages:	Python, Java, SQL, JavaScript, HTML, CSS
Full-Stack & Software Development:	React.js, Node.js, Express.js, MongoDB, REST APIs, Database Integration, OOP, Git/GitHub
Machine Learning & AI:	Machine Learning, Scikit-learn, Feature Engineering, Model Evaluation, Classification, Data Preprocessing; working knowledge of TensorFlow, Keras, NLP fundamentals
Data Analysis & Visualization:	Pandas, NumPy, Matplotlib, Seaborn, Data Cleaning, Power BI; familiarity with Tableau
Core Concepts & Tools:	Data Structures & Algorithms (DSA), Problem Solving, Jupyter Notebook, APIs, Microsoft Excel
Soft Skills:	Analytical Thinking, Team Collaboration, Communication, Time Management, Quick Learning
Certifications:	Oracle Analytics Cloud 2025 Certified Professional; Databricks Generative AI Fundamentals Accreditation; Deloitte Data Analytics Job Simulation; Foundational C# with Microsoft (freeCodeCamp & Microsoft)

WORK EXPERIENCE

Data Science Intern — Algorism Labs Private Ltd

Jun 2025 – Jul 2025

- Conducted exploratory data analysis and statistical evaluation on a dataset of 3,000+ records to uncover key trends and patterns.
- Collaborated with a 3-person cross-functional team to preprocess and validate data, improving consistency and accuracy for downstream analysis.
- Built and evaluated machine learning models using Python and Scikit-learn to support predictive analysis tasks.

Data Science Intern — CS Globus

Dec 2025 – Jan 2026

Coimbatore

- Collaborated with project teams to develop data-driven solutions, applying data cleaning and exploratory analysis to support business objectives.
- Supported software testing, documentation, and analytical reporting across project deliverables.
- Applied problem-solving and critical-thinking skills to troubleshoot data issues and support project goals.

Web Development Intern — WebGen Technology

Jun 2024 – Jul 2024

- Collaborated with a 3-person team to develop responsive web pages using HTML, CSS, JavaScript, and React.
- Built and maintained reusable UI components, streamlining front-end development across project pages.
- Conducted software testing and authored project documentation to support smooth project delivery.

PROJECTS

Fraud Detection Using Machine Learning

- Developed a machine learning model on 7,000+ financial transaction records, applying feature engineering to identify fraud-indicative patterns.

- Performed data preprocessing, including handling class imbalance, to improve model reliability on real-world transaction data.
- Trained and evaluated classification models using performance evaluation techniques to detect fraudulent transactions.

Technologies: Python, Scikit-learn, Pandas, NumPy

E-Commerce Sales Dashboard & Customer Analytics

- Analyzed 3,000+ sales records using Python, SQL, and Power BI to surface revenue trends and customer spending patterns.
- Built interactive dashboards visualizing monthly sales trends and customer segments to support data-driven business decisions.
- Cleaned and transformed raw transactional data to ensure accuracy and consistency across reporting views.

Technologies: Python, SQL, Power BI

TrustLink – Centralized Donation Management System

- Built a full-stack web application connecting 3 stakeholder roles — donors, NGOs, and orphanages — with transparent donation tracking.
- Designed request management workflows to streamline coordination and communication across all stakeholder groups.
- Implemented donation tracking features to improve transparency and accountability across the donation lifecycle.

Technologies: React.js, Node.js, Express.js, MongoDB

Smart Complaint Assistant – AI-Based Civic Issue Management System

- Developed a full-stack complaint management platform using React.js, Node.js, Express.js, and MongoDB.
- Implemented features for reporting, tracking, and resolving civic issues to streamline issue resolution workflows.
- Designed the platform architecture to support scalable handling of multiple complaint categories.

Technologies: React.js, Node.js, Express.js, MongoDB

COVID-19 Data Analysis & Visualization (Dec 2025 – Jan 2026)

- Performed exploratory data analysis on a 2,000-row COVID-19 dataset using Python, Pandas, and NumPy.
- Cleaned and processed raw data to enable accurate analytical reporting and trend identification.
- Built visualizations using Matplotlib and Seaborn to illustrate trend analysis and key insights.

Technologies: Python, Pandas, NumPy, Matplotlib, Seaborn

SmartPass – QR-Based Digital Bus Pass Management System (Jun 2024 – Aug 2024)

- Designed a digital bus pass system with QR code generation and verification for secure student authentication.
- Built online pass management features, integrating database storage with real-time validation.
- Automated entry validation through QR code scanning, reducing manual verification effort.

Technologies: JavaScript, React, Database Integration

EDUCATION

SNS College of Engineering, Coimbatore, TN

2023 – Present

B.Tech in Artificial Intelligence and Data Science

CGPA: 8.5 / 10

Mani Higher Secondary School, Coimbatore, TN

2020 – 2023

Higher Secondary Certificate (HSC) & Secondary School Leaving Certificate (SSLC)

HSC — 88% | SSLC — 83%
